ABOUT ME

Having worked on projects ranging from basic systems to cutting-edge data-intensive processing, I have fifteen years of experience in software development. I'm an active participant in the Brazilian Python Community, giving seminars on everything from beginning to expert subjects, and I'm passionate about fostering relationships with developers. Please feel free to reach me on LinkedIn to learn more about my skills!

EXPERIENCE

Specialist Python Developer — Remote - Brazil — Jun 2021 – Current

As a Staff Backend Developer specializing in Python, I lead software architecture projects and mentor team members within a high-volume data intake team. I develop event-driven systems that underpin our analytics solutions, capable of processing millions of goods daily. My work includes creating operating system-neutral software for data management, conducting code reviews, assisting in project planning for other teams, enhancing company policies and of course: coding. I also contribute to public projects such as django-stomp and django-import-export-stomp to promote open access to our developments.

Senior Python Developer — Ribeirão Preto/SP - Brazil — Feb 2019 – May 2025

Utilizing AWS serverless technologies, I progressed from a mid-level developer to a lead developer, crafting cost-effective, HIPAA-compliant health systems. My key responsibilities included leading the development of scalable serverless architectures using AWS Lambda, creating secure health applications with Python frameworks like FastAPI and Django, and guiding my team to ensure project success. Additionally, I achieved significant cost reductions through architectural improvements while maintaining high system performance, as well as enhancing system reliability and deployment speed through AWS services.

Python / PHP / C Developer — Brazil — Jan 2010 – Dec 2018

With over 15 years of expertise in backend development, I specialized in creating scalable, reliable systems. My proficiency in programming languages, particularly Python, alongside extensive experience in database optimization with PostgreSQL, has enabled many businesses to enhance application scalability and speed. Feel free to visit my linkedin to learn more of my past experiences

EDUCATION

Post Graduate (Specialization) in Software Solutions — XP Educação — Mar 2024 – Mar 2025

Post Graduate (Specialization) in Software Architecture — XP Educação — Mar 2024 – Mar 2025

Graduate in Systems Development and Analysis — Batatais / SP - Brazil — Jan 2012 – Dec 2014
