Speaking & Community Leadership

Speaker @ Python Brasl
2024 / 2025
Tech speaker and instructor at Python Brasil, covering distributed architectures, application security, and high-performance data tuning.

Documentation Lead & Technical Mentor @ cumbuca.dev
An initiative dedicated to the socio-technical empowerment of minority and vulnerable groups through accessible technology.

Technical Mentor
Dedicated pro bono mentor for underrepresented developers, focusing on technical excellence and professional growth.

With fifteen years of experience in software development, I have worked on projects ranging from fundamental systems to cutting-edge, data-intensive processing. I am an active member of the Brazilian Python Community, delivering presentations on topics from beginner to expert levels, and I am passionate about fostering developer relationships. Feel free to connect with me on LinkedIn!

Experience

Juntos Somos Mais — Remote - Brazil
Staff Software Engineer — 06/2021 - 03/2026
As a Staff Backend Developer, I led software architecture and mentored engineering teams within high-volume data intake environments. I architected event-driven systems processing millions of goods daily and developed OS-neutral software for data management. Beyond hands-on development, I conducted code reviews, influenced cross-team project planning, and improved organizational technical policies. I also contributed to open-source projects such as django-stomp, django-outbox-pattern and django-import-export-stomp .

Bluestorm Software — Ribeirão Preto/SP - Brazil
Senior Software Developer — 02/2019 - 05/2021
Lead Developer specializing in HIPAA-compliant health systems and AWS Serverless architectures. Expert in building scalable, cost-effective solutions with FastAPI and Django, driving significant operational savings and system reliability while leading high-performing engineering teams.

Other companies — Brazil
Python / C / PHP Developer — 01/2010 - 12/2018
With over 15 years of expertise in backend development, I specialized in creating scalable, reliable systems. My proficiency in programming languages, particularly Python, alongside extensive experience in database optimization with PostgreSQL, has enabled many businesses to enhance application scalability and speed.

Education

XP Educação — Specialization Degree
Solutions Architecture — 03/2024 - 03/2025

Focus: Cloud patterns, microservices orchestration, and scalable system design.

XP Educação — Specialization Degree
Software Architecture — 03/2024 - 03/2025

Key Focus: Distributed systems, Clean Architecture, Design Patterns (GoF/SOLID), and Microservices Orchestration.

Centro Universitário Claretiano — Bachelor of Technology
Systems Analysis and Development — 01/2012 - 12/2014

A 2,500+ hour intensive undergraduate degree focused on accelerated technical expertise and practical software delivery, recognized as higher education by the Brazilian Ministry of Education (MEC).
